About us

From passion to wood

A Danish company, **DLH Group** is one of the world's largest suppliers of wood and wood products. It is a brand that, for over one hundred years, has been associated globally, not only with the material but also with the professionalism, energy, openness and responsibility of the people who have been creating it. Their ideas, skills and courage have enabled the **DLH Group** to develop and successfully conquer international markets, while consistently keeping high standards in terms of environmental issues, human rights and social responsibility. Entering its second centenary **DLH Group** continues to draw power from passion, commitment and fascination of wood that unites its employees.

Responsibility for the environment

Wood is the foundation on which **DLH** has been created. This is why the company pays special attention to responsibility for environment: responsible forest management, forest protection and ecosystems balance. This is confirmed by two most prestigious certificates of chain of custody of wood in the world: **FSC®** and **PEFC**.

Professional service, highest quality product.

DLH Poland was established in 1990. During these 25 years the company has gained a leading position among suppliers of exotic and local wood on the Polish market. This was possible thanks to the fact that the most important objectives of its activities are professional customer service and providing the highest quality products. Today **DLH Poland** is a team of professionals - experienced and knowledgeable in the field of wood and products made out of it. **DLH Poland** also means a developed sales network all over the country which facilitates purchase and choice from an extremely wide range of products. It also means efficient logistics, punctuality and the most convenient form of deliveries.

Unique offer

DLH Poland offers wood flooring, terrace and facade boards, glued table tops, scantlings, natural veneers, sawn timber, chipboards, plywood, Megapan structural boards and SmartSide siding. The basic range of products is complemented by wooden shutters, wood mosaics, garden furniture, doors, fence boards, concrete slabs and barbecues.

BE INSPIRED

WOODEN TABLE TOPS NATURAL BEAUTY AND DURABILITY

Table tops made of glued wood give interior a warm and friendly character. Whether you use them in a kitchen, a shop, a pub, a hotel or in spa, they emphasize the uniqueness of the interior and will help to give it a unique character. It is an offer for all those who appreciate natural materials of high quality and expect durability and resistance.

MODERN AND STYLISH

Wood as a natural material has a unique pattern and beautiful colours. Moreover, it fits well with other materials; this allows using it in modern, as well as stylish and rustic interiors. Customers can choose from several species of wood of different character and colour scheme, so that they are able to choose the table top that perfectly fits any interior.

OAK TABLE TOP

RESISTANCE and flexibility

Glued wood is an excellent material for table tops . The gluing process eliminates natural wood stresses and prevents distortion and cracking. Wooden table tops can also be easily cut and you can give them any shape. It also allows designing kitchen furniture, cabinets, desks or counters in any way. Table tops made of glued wood are easy to install. Attractive price is also encouraging.

BEST for table tops

The use of the hardest, very durable and dimensionally stable wood species makes DLH table tops resistant to scratches, impacts, moisture and temperature changes. It has a great importance in case of intensively used surfaces.

NATURALLY friendly

Wooden table tops are environmentally friendly products. It is people friendly and warm when touched. If properly maintained and used, it will serve for many years. It can be renewed many times; this definitely extends its life. Damage in the form of scratches or pits can be easily removed by sanding the surface and re-protecting it.

ACREN®

NEW MINERAL-ACRYLIC ACREN® SHEETS HAVE BEEN MADE OF A HIGH QUALITY MINERAL BASED COMPOSITE WITH 100% ACRYLIC RESIN. THIS IS WHY THEY COMBINE THE BEST FEATURES OF BOTH COMPONENTS.

They can be used for making kitchen, bathroom and table tops, reception desks and bars, as well as tops of washbasins, bathtubs and shower trays. They can also be used in making extremely impressive decorative materials. Although their surface resembles polished stone, it is warm to the touch. The mineral-acrylic composite is a non-porous material resistant to high temperatures (of up to 210°C), moisture and the interference of fluids. Thanks to this, the surface is stain resistant, does not change colour and is resistant to chemicals. Lack of micro-pores prevents the proliferation of germs, inhibits the growth of bacteria and fungi, providing a sterile surface, guaranteed by the Hygienic Certificate.
